Action by the US House of Representatives to adopt legislation, HR 7061, the Cybersecurity Enhancement Act of 2010, is viewed by Assured Information Security (AIS), Inc. as an invaluable step toward improving America's defenses against cyber attacks.

Charles Green, President and Chief Executive Officer of AIS, Inc., expressed his appreciation for the leadership and commitment of Mr. Arcuri to secure the passage of this legislation by the House. Mr. Green noted that, "Congressman Arcuri certainly understands how critical it is for America to strengthen its ability to fend off cyber attacks against public and private sector interests from a variety of sources." Mr. Green also stated, "I'm pleased to see our Congressman taking policy guidelines proposed by the White House and translating them into real action to assess the threat of hostile cyber actions against the Government, and to develop the educational infrastructure by which this nation can develop and sustain a highly trained and adaptable cybersecurity workforce."

The legislation introduced by Congressman Arcuri, and adopted by the House of Representatives, now goes to the Senate, where it is hoped that action will be taken this year to adopt the Congressman's Cybersecurity Enhancement Act.

AIS, Inc. is a research & development company located in Rome, NY, which works extensively with government agencies in the area of cybersecurity. AIS, Inc. has been recognized twice by *Inc.* magazine as one of the fastest growing companies in the U.S. It is one of a cluster of cybersecurity companies that have grown around the Air Force Research Laboratory in Rome, a cornerstone of Central NY's growing IT corridor.
