IntroVirt

Introspective Hypervisor and Toolstack

IntroVirt is a Introspective Hypervisor and Toolstack that provides real-time and event based monitoring and analysis of Virtual Machines (VMs)

ais

IntroVirt

Introspective Hypervisor and Toolstack

IntroVirt Provides Unrestricted Access...

...at the process level, up through the Operating System. In addition, IntroVirt provides the ability to monitor and manipulate critical operating system resources, including but not limited to file, network, registry and memory

SIMPLY PUT:

INTROVIRT PROVIDES MORE DATA OF RELEVANCE, MORE QUICKLY

IntroVirt has been proven to enhance:

- Reverse engineering
- Dynamic application analysis
- Dynamic forensic analysis
- Malware analysis
- Cyber asset protection
- Training & simulation

ADVANTAGE, INTROVIRT

- Non-invasive application analysis without guest cooperation
- Parses core Windows® data structures
- Traces Windows® system call and return hooking
- Context-based enabling and disabling of event interception

POWER
to see how things actually operate

ABILITY
to control operations

FLEXIBILITY
to develop customized solutions

IntroVirt is offered as an SDK or can be customized to support specific analytical requirements
