

Full Spectrum Cyber Support for Unmanned Aerial Systems

Full Spectrum Cyber Support for Unmanned Aerial Systems

OVERVIEW

In a world of evolving technology, Assured Information Security (AIS) ensures that your Unmanned Aerial Systems (UAS) are secure. We help protect against attacks that alter intended operations and create significant safety issues. We also develop solutions to detect, monitor and protect from unwanted platforms.

Our Services

AIS provides our clients with industry-leading services at any stage of a product's life cycle, including the initial concept and design, research and development, rollout and sustainment. Our unique team comprised of experts in cyber security, engineering and computer science will help ensure that your UAS doesn't fall victim to cyber-attacks.

Consulting and Design

Testing and Evaluation

Secure Solution Development

Counter UAS (cUAS) Capability Development

How We Can Help

- › Offer security and protection to the designer and developer
- › Identify vulnerabilities and risks before they are realized by an adversary
- › Proactively mitigate threats before deployment
- › Establish a baseline understanding of the security of a target system
- › Evaluate adherence to design policies or regulatory compliance
- › Reduce costs and downtime associated with attacks and vulnerabilities within the system
- › Develop tailored solutions to counter threat signals and UAS platforms
