

METATOTAL

ADVANCED CAPABILITY ANALYSIS

- Rapidly analyzes files for malicious indicators
- Provides OPSEC preserving PSP Scanning
- Provides a user friendly interface for reports and analysis

ARCHITECTURE

1. File to be scanned is uploaded in the UI.

2. File is loaded into **Offline MetaTotal** VMs and scanned by supported AV products.

3. Scan report is generated and available in the UI.

4. **Online MetaTotal** keeps local copies of supported AV products up to date.

5. Updates are sent to **Offline MetaTotal** via a one-way network connection or offline file transfer.

Offline MetaTotal Instance

ANALYSIS ENGINE

- Provides a web interface to scan files, view report and analyze results.
- Deploys and manages scan jobs against a diverse set of AV products within an offline environment.
- Designed in a manner to expand analysis capabilities beyond AV (static and dynamic analysis).

Online MetaTotal Instance

UPDATE ENGINE

- Provides a mechanism to package and download updates to be transferred and auto-loaded into **Offline MetaTotal**.
- Maintains a connection so that supported AV engines can be kept up to date.

ROADMAP

- Explore AV network traffic to reveal silent signatures
- Expand AV product set
- Add support for mobile devices
- Enable AV Cloud Emulation
