

CYBER SIDEKICK

Own the Spectrum.
Win the Fight.

Operator Preview Guide

The Mission

The battlefield has gone silent — but the signals haven't. Today's threats ride the spectrum. Drones. Triggers. Trackers. You need a teammate that sees what you can't.

**Cyber Sidekick is your edge
in the invisible fight.**

A deployable cyber/EW tool that rides with you, alerts you fast and acts without hand-holding.

WWW.AINFOSEC.COM

In The Field

CSK doesn't sleep, blink
or second guess.

"Why is that signal
moving with us?"

Warns You First

Detects RF anomalies
and emission patterns
before they turn kinetic.

"Can I shut this down
without call back to TOC?"

Fights Dirty

Deploys pre-scripted
jamming or disruption
when needed — rules of
engagement, built in.

"Is it on my ATAK map, or
do I have to switch apps?"

Blends Seamlessly

Lives inside TAK.
Mounted, ruggedized,
low-drag. Nothing new to
learn, just new to win.

"Will it alert me while
we're moving?"

Watches Your Six

Constant passive
monitoring, even when
you're focused on the
breach.

Sees The Whole Fight. Shares The Load.

**Cyber Sidekick links the tactical edge to HQ—
so your team is never fighting alone.**

Operators: Get instant alerts and real control
on your device, right in the stack.

HQ/Command: See the spectrum picture
across teams and AO, track threats and
coordinate cyber effects.

Automated Playbooks: Run actions locally or,
with your say-so, HQ can trigger effects in sync
with the mission.

No Comms? No Problem. CSK runs local, syncs
when it can, always keeps the operator in
charge.

Built for Ops, Not for the Office

Field-Deployable: Rugged, modular
device – operator mountable.

Operator-Controlled or Autonomous:
You decide who pulls the trigger.

No Internet Required: Local logic, no
uplink dependency.

Built to Integrate: TAK-native, SDR-
compatible, team-aware.

Reality Check

This isn't labware.

Cyber Sidekick is being shaped with one goal:
Get cyber out of the FOB and into the fight.

A PRODUCT OF AIS

What We Need From You

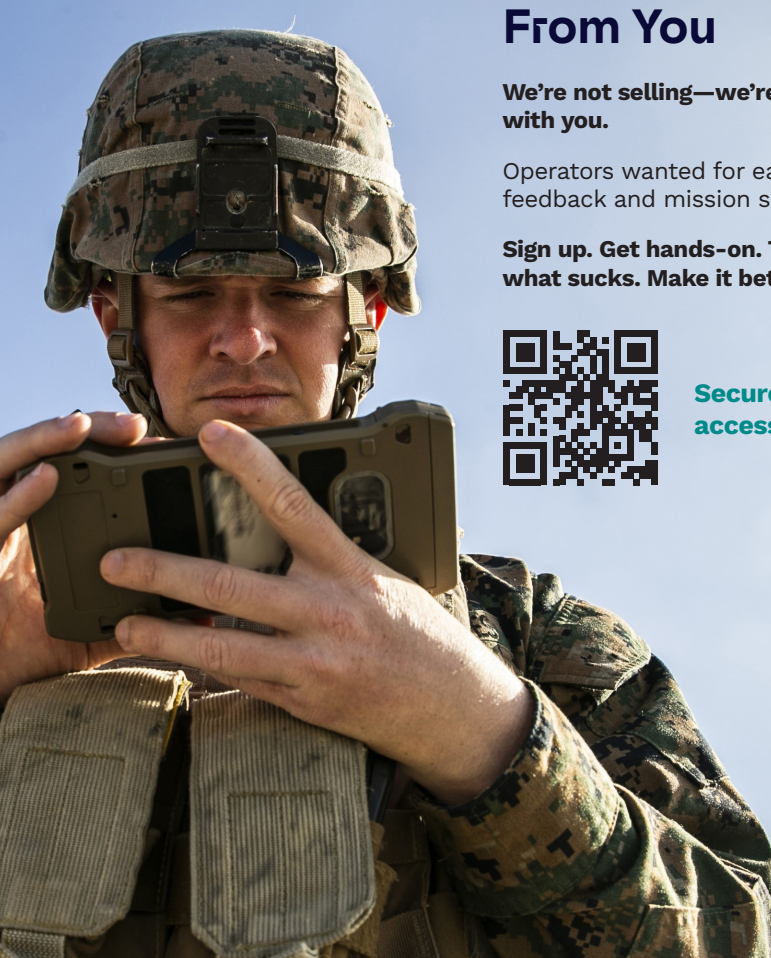

We're not selling—we're building with you.

Operators wanted for early access, feedback and mission shaping.

Sign up. Get hands-on. Tell us what sucks. Make it better.
